

F: SPEECHES

MEMORANDUM FOR:

In my opinion the Director should not make a speech in Boston on the 10th of June when he will have spoken, even though off-the-record, the previous day (9 June 1959) at the Army War College.

This is a strictly commercial group of insurance executives and I would recommend that the Director not accept this invitation, not only because this is not the best forum, but also because June is too early to speak again after his New Orleans talk unless there are some compelling anti-Communist developments that are not now apparent which would cause the Director to make another public address so soon.
